EAEC & EACG new projects:

“Green Roofs Technician Training Program”

“Green Roofs”, is a 36 month project (01/09/2022 - 31/08/2025), funded by the EC under Erasmus+ KA2 Cooperation partnerships in Higher Education, in the 2022 call.

The Green Roofs project, aims to develop an innovative training course and methodology to develop a new, multidisciplinary occupational profile, specialized in green roofs. The project will foster the employability, socio-educational and professional development of young graduates in construction engineering, landscape architecture, urban planning and related studies through the acquisition of skills needed for urban regeneration.

ETRe

Empowering schools' transition readiness to a distance/hybrid learning model enhanced by cloud technology tools

ETRe Project

5th and final Project Meeting

The final project meeting of ETRe took place in London, UK, 27 March 2023. "Empowering schools' transition readiness to a distance/hybrid learning model enhanced by cloud technology tools", is addressed to educators, educational organizations, decision makers, and school principals, aiming to:

- ♦ **create a framework of digital competences** and a **set of the characteristics** of an educational digital tools repository,
- ♦ **explore the importance and the add-on value of the available open source tools**,
- ♦ **empower educators** by offering a set of easy-to-read information for tools,
- ♦ **develop a guide on how to adapt the suggested framework within a classroom**
- ♦ **develop a distance/hybrid learning certification** process for a school organisation to set a standard for schools that wish to achieve an adequate level of readiness.
